

The board provides its students and staff access to a variety of technological resources. These resources provide opportunities to enhance learning, appeal to different learning styles, improve communication within the school community and with the larger global community, and achieve the educational goals established by the board. Through the school system's technological resources, users can observe events as they occur around the world, interact with others on a variety of subjects, and acquire access to current and in-depth information.

The board intends that students and employees benefit from these resources while remaining within the bounds of safe, legal, and responsible use. Accordingly, the board establishes this policy to govern student and employee use of ~~any school system~~ technological resources owned, leased, maintained, or otherwise controlled by the school system. This policy applies regardless of whether such use occurs on or off school system property, and it applies to all school system technological resources, including but not limited to computer networks and connections, the resources, tools, and learning environments made available by or on the networks, and all devices that connect to those networks.

**DRAFT**

The use of school system technological resources, including access to the Internet, is expected to be exercised in an appropriate and responsible manner. Individual users of the school system's technological resources are responsible for their behavior and communications when using those resources. Responsible use of school system technological resources is use that is ethical, respectful, academically honest, and supportive of student learning. Each user has the responsibility to respect others in the school community and on the Internet. Users are expected to abide by the generally accepted rules of network etiquette.

General student and employee behavior standards, including those prescribed in applicable board policies, the Code of Student Conduct, and other regulations and school rules, apply to use of school technological resources, including access to the Internet.

In addition, anyone who uses school system computers or electronic devices, accesses the school's electronic storage or network, or connects to the Internet using school system-provided access must comply with the additional rules for responsible use listed in Section B, below. These rules are intended to clarify expectations for conduct but should not be construed as all-inclusive.

All students must be trained about appropriate online behavior as provided in policy 3226,

1. School system technological resources are provided for school-related purposes only. Acceptable uses of such technological resources are limited to responsible, efficient, and legal activities that support learning and teaching. Use of school system technological resources for commercial gain or profit is prohibited. Student
