

The Academy is designed especially for students who demonstrate academic excellence and have the ability to excel in a dynamic school environment. It will provide accelerated learning for students and offer exciting academic and extracurricular activities. Students will:

- Participate in in-depth study of topics in science, math, reading, and other subjects
- Engage in problem-solving and critical thinking
- Use modern technology as a learning tool
- Develop leadership skills
- Flourish in their capacity to think creatively and at a higher level

Above all else, the Academy will help students to expand their intellect, encourage high academic achievement, and nurture personal goals and development.

Students who will be in grades K-5 for the 2022-2023 may apply. Students should demonstrate academic excellence in one of two ways: 1. they meet the qualifications for our Academically and Intellectually Gifted (AIG) program or 2. they are in the top 10 percent academically for their grade level.

Yes. There is an application process, and parents may apply online. Students qualify for the Academy if they meet the requirements for our Academically and Intellectually Gifted (AIG) program or they are in the top 10 percent academically for their grade level. Students who apply and qualify will be entered into a lottery, which will select the students who will attend the Academy.
